Adding Live Chat code to your Squarespace Site

(Last Updated On: June 26th, 2019)

1. In the **'Home Menu'**, click **'Settings'** > **'Advanced'** > **'Code Injection'**.
2. Add valid HTML or scripts into the footer field.
3. After adding your code, click **'Save'**.

To edit securely, you need to click **'Disable Scripts in Preview'** at the bottom of your site, this will stop the Moneypenny live chat from working while you edit the site. However this won't affect users on the live site.
